RE: Site Inspection, Georgia Pacific, Gypsum Quarries, M/041/009

On March 29, 1988, Holland Shepherd and I inspected the gypsum quarries reclaimed in 1987 by Georgia Pacific. An excellent job has been done by Bill Carter and ~~Mersch Ward~~ ^{Brent Bastion} in grading and contouring the Western Claims (north area) and a portion of the Crescent claims.

There was no topsoil available to spread over these regraded areas. Seed was broadcast directly onto the shale-gypsum overburden and covered by dragging a chain. It is hoped that the overburden will quickly weather into a finer material on the surface capable of supporting vegetation.
